*Do your llamas . . .*

- focus on YOU?
- get excited when they see you coming and it's NOT feeding time?
- approach you confidently and respectfully?
- calmly allow you to touch them everywhere ... even when off lead?
- follow you readily anywhere — at home and away from home — on a completely loose lead ... and with NO lead?
- play with you?
- come to you for support and reassurance?

*And wouldn't it be awesome ... if it took you one-tenth of the time to establish a 10-times-better relationship with each of your llamas?*
